**Product Profile**

## Daemar

Daemar manages the sourcing and delivery of millions of Essential Components to the manufacturing and MRO marketplace. Industry applications are broad; from high volume assembly lines requiring design assistance and supply chain management, all the way to the simple replacement of a single component for maintenance.

## Cost Saving Solutions

For Daemar our business is much more than simply providing products; we work with our customers to deliver Supply Chain solutions that meet their specific challenges. Daemar has developed all of the capabilities required to support our customers' Lean Manufacturing initiatives – providing JIT delivery, vendor managed inventories and computer systems integration that creates virtual inventories allowing customers to see our inventory as if it was their own.

## Who We are

Daemar was founded in 1973, to serve the fluid sealing and precision components markets. Daemar has remained firmly focused on that original premise by concentrating on offering the highest quality products and exceptional customer service.

To consistently meet and exceed our customers' expectations, Daemar Inc. is ISO-9001: registered and most of our suppliers have either TS-16949 or ISO-9000 quality registrations.

Daemar Inc. has a network of 4 strategically located stocking facilities to serve the North American marketplace. So where ever you are we've got you covered.

## Knowledgeable Professionals

Supported by the Daemar regional warehousing network and our global partnerships – our customers experience fast, courteous service throughout the world. All locations are fully inventoried and staffed with experienced and knowledgeable supply chain professionals.

# RETAIN

## Retain

Daemar's line up of Engineered Fasteners provides non-threaded retaining solutions for a wide range of applications. Products include: retaining rings, spiral rings, wave springs, constant section retaining rings, push-on fasteners, and plastic fasteners.

---

## Slide

A whole range of bushings and bearings. TH Series composite bushings are available in sleeve, flange and thrust washer styles. Self Lubricating Linear Bearings in open, closed and pillow block configurations. Solid Metal bushings feature metallic structure with a range of various lubrication methods depending on the series. Powdered metal bushings formed in various metals including: bronze, iron and other alloys and metals.

---

## Seal

DMR seal solutions extend the operating life of bearing systems and reduce the overall costs of maintaining these systems. Featuring inch & metric sizes in a range of seal designs and material compounds for any operating environment. Shaft sizes from 1/4" to 40". Our Seal line also includes: bearing isolators, JM Clipper seals, v-rings, wheel hub seals, axle seals, high pressure seals, end caps, mechanical seals and metal detectable seals.

---

## Protect

Caplugs manufactures a complete line of caps designed to protect virtually any product for virtually any application. Whether you're protecting tubes, pipes, fittings, O-ring ports, furniture, or a part requiring a custom solution, Daemar has the cap you need.

---

## Align

Daemar's extensive line of aligning products includes an assortment of Shim and Keystock products. DMR Slotted Shims eliminates hand cutting of shims which can cause sharp corners or burs. Slotted shims provide a more stable alignment by eliminating stacking of shims. DMR Steel Keystock is used to provide driving torque between shafts and pulleys, gears, sprockets, etc.

# Industry Applications

Daemar's unique mix of products find applications in a varied array of industries. The core group of products have a focus on applications with shafts and/or axles, these products provide fluid sealing, alignment, retainment, fastening and product protection functions.

Our core strength in all of the industries that we service is our ability to manage the supply chain and ensure that product is available when and where our customers require it.

- Automotive
- Oil & Gas
- Green Energy
- Material Handling
- Food & Beverage Processing
- Pharmaceutical Processing
- Power Generation
- Marine
- Aerospace
- Mining & Natural Resources
- Forestry, Pulp & Paper
- Agricultural Equipment
- Construction Equipment
- Public Utilities – Water Treatment
- Valves
- Pumps
- Gearboxes

## Custom Kitting

As a value added benefit Daemar's Packaging and Branding Group designs and assembles kits for customer specific requirements such as:

- *In The Field Maintenance*
- *Manufacturing Production Lines*
- *Aftermarket Maintenance and Repair Kits*

These kits are effective tools for reducing costs for maintenance and assembly staff by eliminating the guess work in part selection and saving time in part sorting.

## Private Label Packaging

Daemar's Packaging and Branding Group can provide Private Label product packaging with your company logo and product numbers.

## Product Sort

At Daemar we understand that some of our customers' automated manufacturing and assembly processes can not accept non-conforming product, for these situation we can offer 100% product hand sort to ensure that all contaminating parts objects are removed.

## EDI (Electronic Data Interchange)

Many of Daemar's larger customers enjoy the benefits of interacting with Daemar through EDI:

- *Increased productivity*
- *Improved transaction quality*
- *Reduced total cost of ownership*

Setting up an EDI program with Daemar can allow visibility of our inventory levels on your ERP system, orders can be placed or modified and Daemar can verify shipment of goods. Your staff can spend less time on repetitive data entry tasks and more time on value added tasks. Accounting functions such as invoicing and payment can also be streamlined through the use of EDI.

## Onsite Product Training

Daemar can develop custom training programs tailored to the requirements of your staff. Our technical sales reps host lunch & learns at your facility; these sessions allow us to familiarize your staff with our products. These interactive sessions allow your staff to see product, ask questions and learn about the wealth of resources that Daemar has available.
