

## GARLOCK AT A GLANCE

Solve unique sealing challenges with our portfolio of high-performance solutions

### BROAD PRODUCT RANGE

Garlock® has developed countless products, including Gaskets and Sheet Material, Metallic Gaskets, Resilient Metal Seals, KLOZURE® Oil Seals, Bearing Isolators and Mechanical seals, Compression Packing, Expansion Joints, Elastomer Seals, Hydraulic Components, and tools to increase production in your plant, ensure safety, and reduce costs.

### PRODUCTS DESIGNED TO LAST

Every Garlock product is designed, constructed, and tested to ensure a longer operating life. This leads to lower cost, more safety, and bottom-line savings consistent with Life Cycle Costing (LCC) programs.

### DESIGN/ENGINEERING

Garlock application engineers have designed countless sealing solutions worldwide, providing on-site surveys, product recommendations, and training.

### TESTING/QUALITY ASSURANCE

With the most complete in-house testing facilities in the industry, Garlock can provide test verification documentation for your sealing solution, based on your specifications, including any industry or government standard.

### A PARTNER PRESENT EVERYWHERE

Globally, Garlock proudly serves a wide range of processing industries, including:

- » Chemical Processing
- » Power Generation
- » Primary Metals
- » Mining
- » Water/Wastewater
- » Pulp & Paper
- » Oil & Gas
- » Food and Pharmaceuticals
- » Marine
- » Original Equipment Manufacturers

## DIFFERENTIATED PRODUCT OFFERINGS

Explore solutions for the most unique and challenging applications. Some examples of our differentiated products include:

### **GYLON EPIX®**

Featuring our revolutionary honeycomb surface design, GYLON EPIX® offers a broader range of applications than traditional PTFE gaskets and excels in used, worn, and pitted flanges. GYLON EPIX® delivers the tight sealing and load retention properties of 1/16" and the conformability of 1/8" while reducing inventory with a single thickness.

### **MULTI-SWELL™ Style 3760/3760-U Gasket**

MULTI-SWELL™ Style 3760/3760-U gaskets reduce leaks in water, oil, and select liquids via controlled swell technologies. Two times more compressible than standard fiber gaskets, irregular surfaces and less-than-ideal installation conditions to ensure an ultra-tight seal.

### **Style P2000 Pipe Expansion Joint**

The Style P2000 expansion joint combines optimal mechanical design with the latest advancements in textiles and elastomer technology. With exceptional pressure and movement capability, this style has the versatility for applications ranging from common piping to the most critical and safety conscious.
