A Series

The rubber elastomer outer covering tolerates thermal expansion as well as roughness in the housing bore. There will be no fretting corrosion. Furthermore, damage of the housing bore will be prevented when frequently replaced. This qualifies for sealing gaseous or liquid media.

Type A

Type AS

Type AO

B Series

Metallic casing enables easier fitting. However, this type of seal demands closer tolerances in the housing bore to ensure proper sealing on the outer covering.

Type B

Type BS

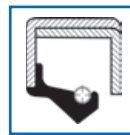

Type BO

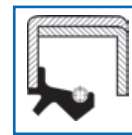

C Series

Metallic casing and reinforcing cap. Sealing and mounting identical with type B. Preferentially applied in case of rougher operating conditions and where larger dimensions are utilized. Less delicate in case of incorrect mounting due to reinforcing cap.

Type C

Type CS

Type CO
